EDUCATION

Manipal Institute of Technology [MIT] <i>Bachelor of Technology – Computer Science and Engineering</i> <i>Courses: Data Structures, Algorithms, Object Oriented Programming, Database Management, Operating Systems, Computer Architecture</i>	Manipal, India 2023 – 2027 (Expected)
Dr. Kalmadi Shamrao Junior College <i>Class XII</i>	Pune, India 2023
New India School <i>Class X</i>	Pune, India 2021

SKILLS SUMMARY

Languages: Python, C++, Java, C, SQL, JavaScript

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Computer Networks

Backend & Systems: Node.js, Django, DRF, Flask, PostgreSQL, Redis, Celery

Web & Tools: React, Tailwind CSS, Firebase, Git/GitHub, VS Code, REST API design

PROJECTS

Agentic Stock Research & Analysis Platform - Designed and implemented a backend research platform in Django REST Framework, building the API layer, data models, and service logic that power LangChain-based agents for automated financial analysis. - Architected an asynchronous task pipeline with Celery and Redis to handle real-time market data ingestion and report generation without blocking request threads, improving throughput under concurrent load. - Integrated multiple external market-data APIs, writing and debugging data-parsing and error-handling logic to keep reports accurate and reliable.	Python, Django, DRF, LangChain, Celery, Redis
Personal Finance Tracker - Built a full-stack finance tracker with complete backend ownership: schema design, raw SQL queries, JWT-based authentication with refresh tokens, and role-based middleware. - Implemented automatic transaction categorization using layered regex parsing of UPI SMS notifications with an LLM fallback, plus SHA-256-based deduplication to keep records clean. - Wrote SQL aggregation queries (GROUP BY-based) to power dashboard analytics for spending trends, budgets, and investment tracking.	Node.js, PostgreSQL, JWT, Regex/LLM Parsing
Pustak Bhishi – Library Management Application - Developed a full-stack library management system handling 800+ books with Marathi metadata support; deployed on Vercel. - Implemented authentication and role-based access control (Admin/User) with real-time borrow/return tracking, bulk Excel import, and an admin dashboard.	React, Tailwind CSS, Firebase
Digital Temperature Monitor Programmed ADC sampling and calibration logic on an LPC17xx microcontroller to convert LM35 sensor input into accurate real-time Celsius readings on an LCD display.	Embedded C, LPC1768, ADC, LCD Interfacing
EXPERIENCE AND EXTRACURRICULAR	
Outstation Committee Member – MIT Manipal Coordinate logistics, accommodation, and travel for 100+ participants across two college fests, collaborating with cross-functional teams to ensure smooth on-site execution.	Manipal (On-site): 2023 – Present
Student Exchange Program – Canada (High School) Attended a Canadian school during summer break; gained cross-cultural communication skills and international exposure.	
Community Service – Pune (12th Grade) Volunteered in cleanliness drives and awareness campaigns during school-led community initiatives.
